### Limitless Computing to Preview New SightSpace 3D Features at AIA

BOULDER, CO - May 15, 2012 - [Limitless Computing Inc.](#)<sup>®</sup>, a leading provider of 3D mobile Augmented Reality, today announced that a “sneak preview” of three new features for SightSpace 3D, the only mobile Augmented Reality application for Google SketchUp™, will be available to press and attendees in booth 1908 at the [AIA 2012 National Convention and Design Exposition](#) in Washington DC, May 17-19. These features will be officially launched at a later date.

**What:** “Sneak preview” of three significant new features for SightSpace 3D, the only mobile Augmented Reality application for Google SketchUp™. SightSpace 3D enables mobile viewing of Google SketchUp designs on mobile devices, offering Augmented Reality capabilities, which overlay digital models over existing physical environments. Stereoscopic 3D is available while using Augmented Reality wearing 3D glasses.

SightSpace 3D is integrated with the Google 3D Warehouse, opening up limitless possibilities. Architects and builders can preview buildings on site and educators can show famous buildings to students. Furniture shoppers can see how pieces would look in their own homes and new countertops, appliances, and more can be viewed as if they were in one’s own kitchen or bath.

**Where:** Booth 1908, [AIA 2012 National Convention and Design Exposition](#), Walter E. Washington Convention Center, Washington DC, May 17-19.

**When:** Thursday, May 17, 10 am - 4 pm

Friday, May 18, 10 am - 4 pm

Saturday, May 19, 10 am - 2 pm

**For More Info:** <http://convention.aia.org/event/convention-home.aspx>
