Limitless Computing to Feature Augmented Reality Entertainment at CES
Launching VYZAR - Your Digital World Made Real in Booth 25813

BOULDER, CO - January 7, 2013 - [Limitless Computing Inc.](#)[®], a leading provider of 3D mobile Augmented Reality, today announced that it will feature its custom mobile Augmented Reality entertainment experiences for Android and Apple devices in booth 25813 in the Gaming Showcase at CES, including the launch of its new VYZAR, an advanced geo location and marker-based [3D Augmented Reality \(AR\) technology](#).

Experience Augmented Reality entertainment in Limitless Computing's booth 25813 including:

- [VYZAR](#) is your digital world made real. Its advanced geo location and marker-based, high-performance AR and 3D engine assimilates with the physical world to offer the most fully integrated real-time Augmented Reality available today. Its 2D, 3D, and interactive AR rotates, pans, and zooms. VYZAR powers Limitless Computing's Circulizar Gifts and SightSpace 3D innovations.
- Unwrap your virtual world with [CES 2013 mobility award nominee Circulizar Gifts](#), a new standard for virtual gift-giving through Facebook. Friends and family will be delighted to receive a flaming dragon, falling snowflakes, birthday balloons, hearts, pets, and more. Devices are notified when recipients can virtually unwrap their presents, view a personalized message and interact with the fully animated, virtual gift, in a real-world background and real time.
- See what your space can become with the groundbreaking [SightSpace 3D](#) model viewer with Augmented Reality, which enables mobile viewing of SketchUp models overlaid over physical environments. SightSpace 3D is integrated with the Trimble 3D Warehouse, opening up limitless possibilities. Educators can show famous buildings to students, furniture shoppers can see how pieces would look in their own homes and new countertops, appliances, and more can be viewed as if they were in one's own kitchen or bath.

Limitless Computing representatives will lead a press-only conference about 3D Mobile Augmented Reality on January 7 at 1:30 at Mandalay Bay, Level 3, South Seas Ballroom J.

About Limitless Computing

Boulder, CO-based [Limitless Computing Inc.](http://www.LimitlessComputing.com) has provided [cloud computing](#) since 2006, specializing in Augmented Reality. Limitless Computing brought Augmented Reality to Trimble SketchUp in 2011 with the release of the mobile application SightSpace 3D for Apple and added Kindle Fire and Android devices in 2012. Its newest product, Circulizar, set a new standard for virtual gift-giving through Facebook (www.LimitlessComputing.com)
