

# LIMITLESS RENDERING

## ON DEMAND RENDERING

**Limitless Rendering**, an on demand rendering service, decreases render times for architects utilizing Revit® software an average of ten-fold without sacrificing quality. It is ideal for architects and 3D Modelers looking to focus on their business, reduce rendering times, and increase productivity and efficiency. We deploy supercomputing technology, saving you hardware and software investments and freeing up IT resources. With lower costs and faster turn around times, you can complete more projects.

### A Complete Solution

You are in the challenging position to decrease render times in a prompt and cost-effective manner. Limitless Rendering provides easy integration with your Revit® designs so you can complete your projects faster without sacrificing quality.

### Easy Integration

Our on demand rendering works alongside your existing design flows. You can choose to render with us for larger scenes and render locally for smaller jobs.

### Reduce Render Times

The supercomputing power of Limitless Rendering means quick turnaround time for your rendered images. You get the exact view you want to showcase your designs. While your computer may be tied up rendering one view, our supercomputers can render multiple scenes.

### Lower Costs

Limitless Rendering does not require any hardware or software investments. You lower your IT costs and reduce infrastructure complexity while only paying for the render time you use.

### Highlights

- **Reduces render times**
- **No hardware or software investment**
- **Render multiple scenes at once**

## Rendering Work Flow

### 1. Export

Setup your view in Revit ®, select Rendering options, and export from Revit ® to an .fbx file.

### 2. Upload

Upload the .fbx file to our computers and submit the scene to our supercomputers.

### 3. Download

Adjust your exposure settings and download your rendered image.

## Frequently Asked Questions

**Q.** How do I transfer my data to and from the Limitless Rendering service?

**A.** Data are transferred through your standard Internet connection to our website over a secure SSL connection.

**Q.** How do I access the rendering service?

**A.** All access takes place over the Internet through our website. From your account page, you can submit new renders, see your previous renders, and adjust rendering settings.

**Q.** Who owns the data?

**A.** You do! You maintain ownership of all data uploaded to our service and all images rendered. We are not considered to be a third party in lease contracts. You will not need additional provisions with your data provider to host your data with us. We do not have people analyzing your data or accessing your data because our system is primarily self-service.
